

# Magazine

Department of Microbiology  
Techno India University, West Bengal

1. First edition of e-Magazine Consortium published in May' 2023

The e-magazine intends to provide a platform for expressing student's scientific and innovativemindfulness towards the subjects that they are studying or coming across duringtheir academic studies. It will also bring out the current trends in microbiological research whichwould replenish the members of the department with scientific knowledge. Our planning issomewhat systematized by our view that the subject matter of microbiology might be depicted asoccupying a multidimensional matrix. The e-magazine will continue to prosper if it satisfies the need so the members towards various microbiological aspects.

2. Second edition of e- Magazine Consortium published in December 2023
